## AMENDMENTS TO THE CLAIMS

This listing of claims replaces all prior versions, and listings, of claims in the application:

## 1-13. (canceled)

- 14. (currently amended) A drill bit for drilling hard tissue and injecting medication comprising:

  a shaft having a proximal end with a first opening, a distal end with a second opening and
  a beveled cutting surface;
  - a lumen inside the shaft that extends between first and second openings, and that receives debris entering the first opening as a result of operation of the cutting surface; and an open notch disposed in the shaft, and having a length greater than a diameter of the lumen-; and
  - wherein an overall length from a distal tip of the cutting surface to a proximal end of the open notch is greater than a thickness of the hard tissue.
- 15. (previously presented) The drill bit of claim 14, wherein the notch is contiguous with the second opening.
- 16. (currently amended) The drill bit of claim 14, wherein the eutting surface terminates in a distal tip, and a proximal end of the notchoverall length is about 0.10 to 0.125 inches from the distal tip.
- 17. (previously presented) The drill bit of claim 14, wherein the notch is axially extended from the second opening.
- 18. (previously presented) The drill bit of claim 14, wherein the shaft is substantially smooth.
- 19. (previously presented) A method of injecting a substance into a bone, comprising: using a drill bit according to claim 14 to drill a hole in the bone; and injecting the substance into the proximal opening.
- 20. (previously presented) The method of claim 19, comprising using a hypodermic needle to inject the substance.

- 21. (previously presented) The method of claim 19, wherein the substance comprises a medication.
- 22. (previously presented) The drill bit of claim 14, wherein the shaft is disposed in an elongated hub.
- 23. (previously presented) The drill bill of claim 22, wherein the lumen is extended from proximal and distal ends of the hub.
- 24. (canceled)
